Listing of claims:

1. (currently amended) A method for managing software code development across a plurality of software code repositories, the method comprising:
  - identifying projects for a software development cycle;
  - initiating concurrent software code development of functional development packages in at least two software code repositories;
  - approving the functional development packages within each of the software code repositories;
  - identifying omissions or conflicts between the approved functional development packages in the at least two software code repositories;
  - resolving the omissions or conflicts between the functional development packages in the at least two software code repositories; and
  - releasing the functional development packages.

2. (original) A method according to claim 1, further comprising:
  - approving projects for the software development cycle.

3. (original) A method according to claim 1, further comprising:
  - submitting the functional development packages for system testing.

4. (original) A method according to claim 1, further comprising:
